April 17-18, 2020 ♦ up to 13 CECH Continuing Education Contact Hours (up to 5 Radiology Credits▲)

GOALS & OBJECTIVES OF PROGRAM

The attending foot and ankle physician should be able to have a better understanding of multiple topics and subjects discussed during the 13 hours of continuing medical education classes with improvement in current knowledge and applications of treatment techniques for conditions involving the lower extremities.

- Appreciate the history of arthroscopy and its applications for use
- Understand the basic arthroscopic principles and techniques.
- Be able to identify and manipulate arthroscopic instrumentation and maneuvers.
- To review current trends and recommended protocols for the surgical approach to the ankle with arthroscopic techniques.
- To learn and be able to apply specific arthroscopic techniques to commonly encountered ankle pathologies.
- To provide additional understanding of how to diagnose and treat specific conditions such as foreign bodies, talar dome cartilage injury, anterior tibial bone spurs, and soft tissue pathology.
- To better understand advanced techniques of arthroscopy, including arthrodesis, intra-articular bone grafting and the applications for ankle trauma.
